# ZenaSwimwear.com Fabric Matching

**How to read the Chart**

ZenaSwimwear.com has devised a Prints/Solids matching chart.  This chart is to help customers who would like to add a contrasting fabric binding or trim to their swimwear and would like to know if one of our Solid Fabric's will match a color in a print that we carry.   Find the Print or Specialty code of the Fabric that you like, referenced in the most left hand column.  The solids are across the top of the chart.  The Star which intersects both indicates a match.

**Please Note**:  As the customer you can match any fabric and trim together.  Your imagination is what makes a unique swimsuit.  The chart below is a reference for customers who would like a color match, and not necessarily a design suggestion.
